PT’s **NEW! VR35TVT VAPOR RECOVERY VENT** breathes new life and protection on DOT406 Tank/Bobtail Trucks and Trailers. Located on top of the DOT406 trailers’ manway lid, the lower profile of the VR35TVT keeps the product safe in overturn situations. The VR35TVT also provides a greater flow and is durable enough to withstand prolonged use in freezing to hot temperatures.

**VR35 SERIES ADVANTAGES:**

- A356-T6 Aluminum body creates a durable and lightweight sustaining product.
- Greater spring tension ensures a fast and tight seal for closure.
- Engineered poppet design establishes a secured seal that offers both improved flow and protection.
- Low profile assists in avoiding severe breakage which lead to spills in overturn situations.
