

SAFETY PUMPING SYSTEMS

3" VANE PUMP SYSTEM FOR REFINED PRODUCTS

PROTECTING THE ENVIRONMENT. IMPROVING DRIVER SAFETY.

NEVER
BLOW A
HOSE
AGAIN

PT's VANE PUMP SYSTEM brings a new level of safety for the environment and truck drivers. PT's 3" Vane Pump System is a high-performance truck mount four-way valve system for refined liquid products in the combustible and flammable categories. Products such as: diesel, gasoline, alcohol, avgas, biodiesel, fuel additives, synthetic oils. The Vane Pump System delivers where high performance is required, up to 240 GPM truck mounted, curb side. SPS100414

FEATURES AND BENEFITS

TRUCK MOUNTED FEATURE SET

- Never blow a hose again
- Neutral Position - no flow, no pressure
- 25" height X 25" width, 72lbs without pump
- Relief valve protection in both directions of flow
- Standardized, simple operating procedure - "Driver Friendly"
- Tactile feel of pumping process - never slug a line
- Designed for Blackmer TXD3E or equivalent
- Single relief valve pump, single direction PTO - less expensive
- One speed, one rotation, on/off only-pumps last longer, less maintenance
- Crossover options for dual side transloading
- 0 to 240 GPM with fully reversible flow while pump runs in one direction
- No painting, no welding and no cutting
- Assembles with a wrench

SAFETY PUMPING SYSTEMS

4" GEAR PUMP SYSTEM FOR CRUDE OIL TRACTORS

PROTECTING THE ENVIRONMENT. IMPROVING DRIVER SAFETY.

NEVER
BLOW A
HOSE
AGAIN

PT's 4" TRUCK MOUNT GEAR PUMP SYSTEM

is a safe and cost-effective alternative for transferring highly viscous and combustible media: crude oil, frac fluid, asphalts, and tars. PT's 4" Gear Pump System is a four-way valve system rated up to 400 GPM; can be shaft or hydraulically driven; and either driver's, curbside, or truck mounted. Item SPS100415

FEATURES AND BENEFITS

TRUCK MOUNTED FEATURE SET

- Never blow a hose again
- Neutral position - no flow, no pressure
- 28" height X 22" width, 75lbs without pump
- Relief valve protection in both directions of flow
- Standardized, simple operating procedure - "Driver Friendly"
- Tactile feel of pumping process - never slug a line
- Designed for Roper 3648 or equivalent
- Single relief valve pump, single direction PTO - less expensive
- One speed, one rotation, on/off only-pumps last longer, less maintenance
- Crossover options for dual side transloading
- 0 to 400 GPM with fully reversible flow while pump runs in one direction
- No painting, no welding and no cutting
- Assembles with a wrench

SAFETY PUMPING SYSTEMS

4" GEAR PUMP SYSTEM FOR CRUDE OIL TRAILERS

PROTECTING THE ENVIRONMENT. IMPROVING DRIVER SAFETY.

NEVER
BLOW A
HOSE
AGAIN

PT's 4" TRAILER MOUNT GEAR PUMP SYSTEM

is a high performance four-way valve system for unrefined or highly viscous liquid products in combustible and flammable categories such as crude oil, frac fluids, asphalts, and tars. PT's 4" Gear Pump System is rated up to 400 GPM and can be shaft or hydraulically driven. System can be mounted on the trailer, either driver's side or curbside. Item SPS100456

FEATURES AND BENEFITS

TRAILER MOUNTED FEATURE SET

- Never blow a hose again
- Neutral position – no flow, no pressure
- 25” height X 29” width, 67 lbs without pump
- Relief valve protection in both directions of flow
- Standardized, simple operating procedure – “Driver Friendly”
- Tactile feel of pumping process - never slug a line
- Designed for Roper 3648 or equivalent
- Single relief valve pump, single direction PTO – less expensive
- One speed, one rotation, on/off only-pumps last longer, less maintenance
- Crossover options for dual side transloading
- 0 to 400 GPM with fully reversible flow while pump runs in one direction
- No painting, no welding and no cutting
- Assembles with a wrench
